## About Us

**Why we do what we do.** It's not about making linear or center drains — it's much bigger than that, with a more holistic perspective. It's about making a small difference in people's lives every day. Be it a power shower or a relaxing bath, we help create an environment to appreciate and be indulgent in. It's offering distinct details that combine to provide a more pleasing experience... stress free and without water management issues. Making one feel good about their bath surroundings whether staying at a

boutique hotel, a towering luxury hotel, or one's own home. Infinity Drain, it's the complete package of very functional and yet, exquisitely beautiful.

## Our Brand

**Infinitely different.** It's personal. We don't punch steel, we pursue passion, in every individual we hire, in every product we craft. The result — we call it the brand elevation factor. Whether that's artisans sculpting carefully considered flourishes, engineers striving for nano tolerances, or those who quality

# Brilliance in water management.

control and wrap each product, we believe that before the Infinity Drain logo is adorned, our higher standards of craftsmanship, care and devotion must go into it. With a rich resource of styles, finish options and size customization, design flexibility is built right in. And all offered with benchmark reliability. Simply put, it's our passion for design and our obsession for performance.

## **Made in the USA**

**A refreshing perspective on — *We're here for you.***

Infinity Drain both designs and manufactures all our

products in the United States. But we take it a step further by sourcing our raw materials from U.S. suppliers. This means faster turnaround, consistency in material, reliability in quality and a focus on your project first hand. All without worrying about unnecessary shipping and waiting. Our facility and atelier is in the heart of Long Island, New York. And we wouldn't have it any other way. You see, craftsmanship is born here. Service is born here. Discover the finest drains and waterproofing products here... in America, for you.

# Linear Fixed Drains

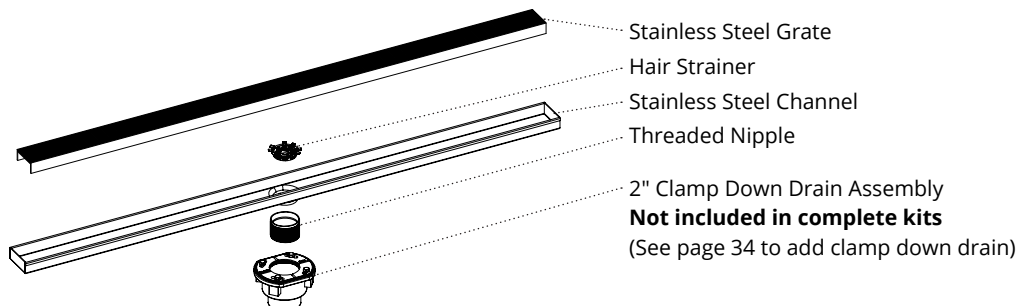

To be seen or not seen. The once humble shower drain is now a point of distinction and a flexibility factor to connoisseurs and devotees of bath design. Modern drains can open up views and provide compelling options. Best of all, they can be measured, crafted and scientifically built to your exact requirements.

# FX Series

## Fixed Length

Pitched channel with a set length and center outlet location. Standard kit sizes or custom fabrication are available.

**The shower —**  
it's not just how it  
looks, it's how it  
makes you feel.

Squares  
Satin Stainless

## **Center** Drains

Let the structure not distract from the function. In the case of these drains that may be hard to do. Hand polished and designed to exacting standards, you may be compelled to add another shower.

## **NEW** Stainless Steel Shower Base

### Lifetime Guarantee

Covers labor, removal, replacement and restoration.\*

### Features

- Lifetime guarantee against waterproofing failure.
- 304L 16 Gauge Stainless Steel.
- Ability to install and flood test same day.
- Ensures exact wall-to-wall and flush against the wall installation.
- Available with curb or barrier free (curbless).
- Includes linear or center drain.
- Standard size: 30"x60", custom available (minimum qty 10).
- Drains are available in multiple styles and finishes.

### The Install Process

**1. Stainless Steel Shower Base** – Arrives factory flood tested with a Lifetime Guarantee. The base is ready to install and features an integral drain, pre-sloped floor, and is coated with surface primer for tile installation.

**2. Stainless Steel Shower Base With Framing** – The base is adhered to the subfloor, leveled and attached to the plumbing. Framing is completed around the shower base or the shower base is placed into a preexisting framed space then secured directly to the framing.

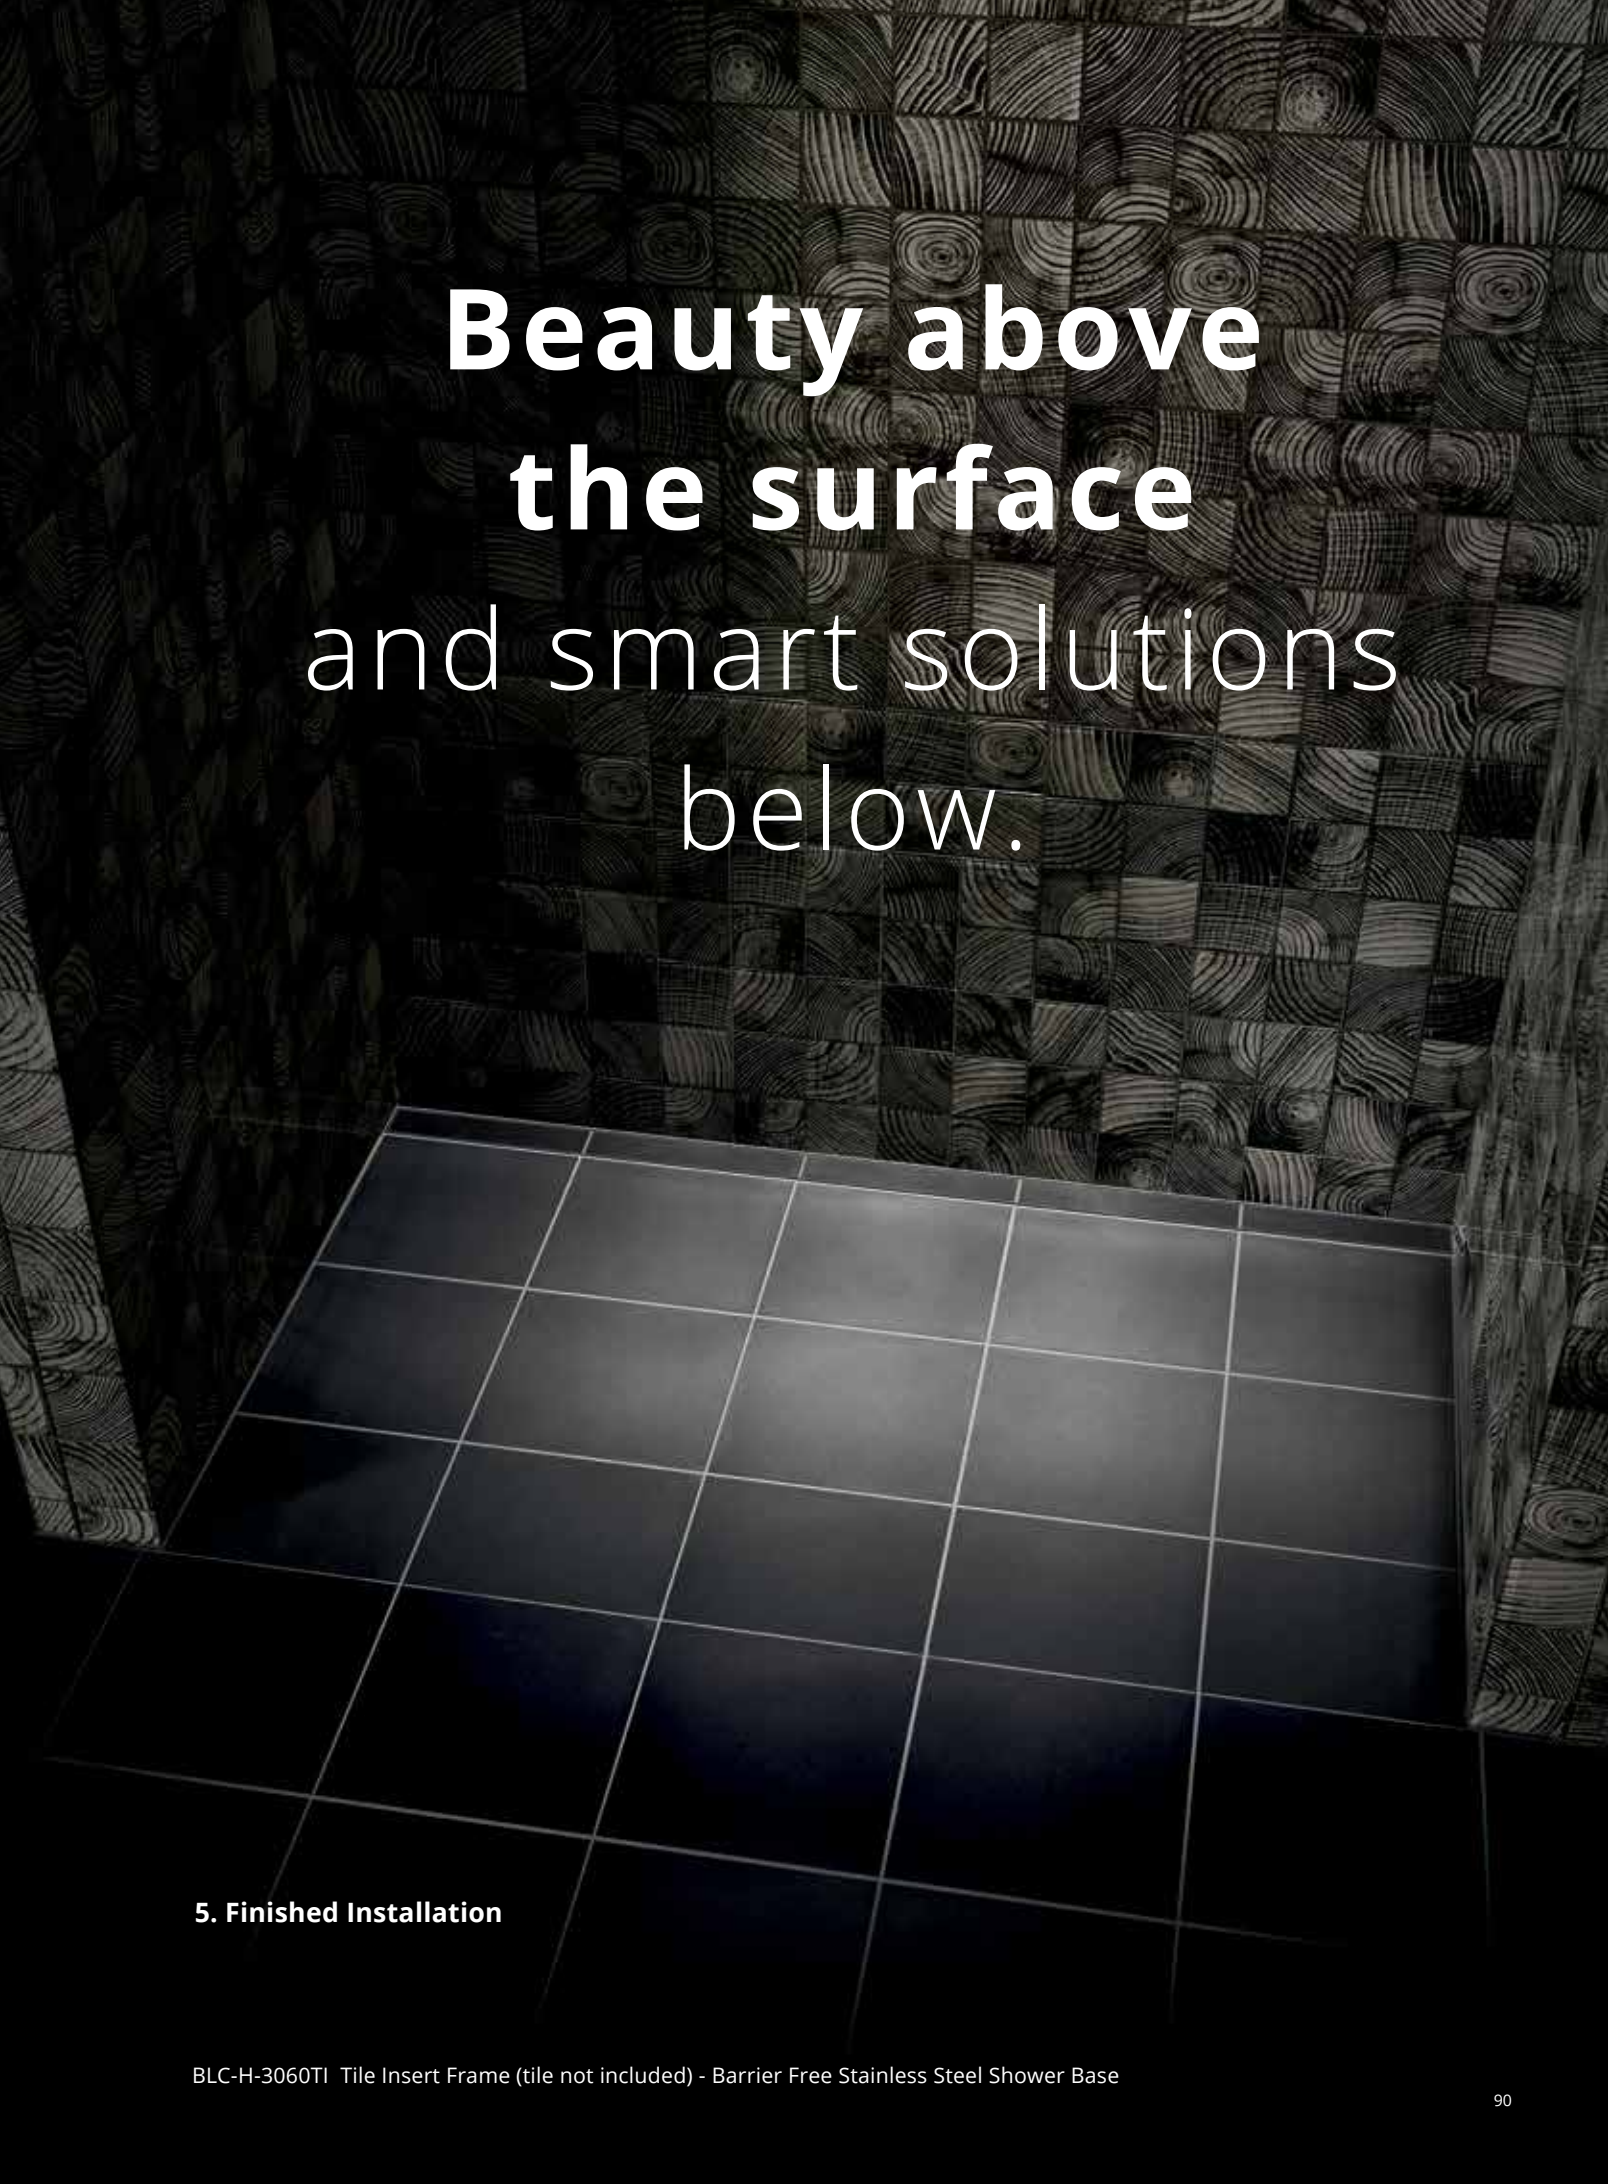

**3. Walls and Waterproofing** – Appropriate backerboard is mounted to the framing and seated on the flange of the shower base. Liquid or fabric waterproofing is applied over the backer board down to the shower base.

**4. Finishing** – Natural stone, glass, porcelain, or ceramic tile are applied to the walls and shower base.

\*See Infinity Drain, LTD. Stainless Steel Shower Base Lifetime Product Guarantee on page 182-184 for full details.

# ALL APPLICATIONS

## Infinite Solutions

Infinity Drain linear drain systems are not just for showers. They are ideal for large scale installations like pools, balconies, driveways, decks, and even smaller applications like sinks and bar tops.

# OUTDOOR

**Site Sizable** drains offer a flexible, durable and sleek solution that is available right away. Stock linear drain components of any series can be joined together to build unlimited lengths. The channel components can be cut to any sizes needed and outlet locations can be placed wherever they are needed. Angle joiners also allow for the ability to create 90° turns along the linear run. For outdoor and/or pool applications (1) outlet for every 96" of drain is recommended.

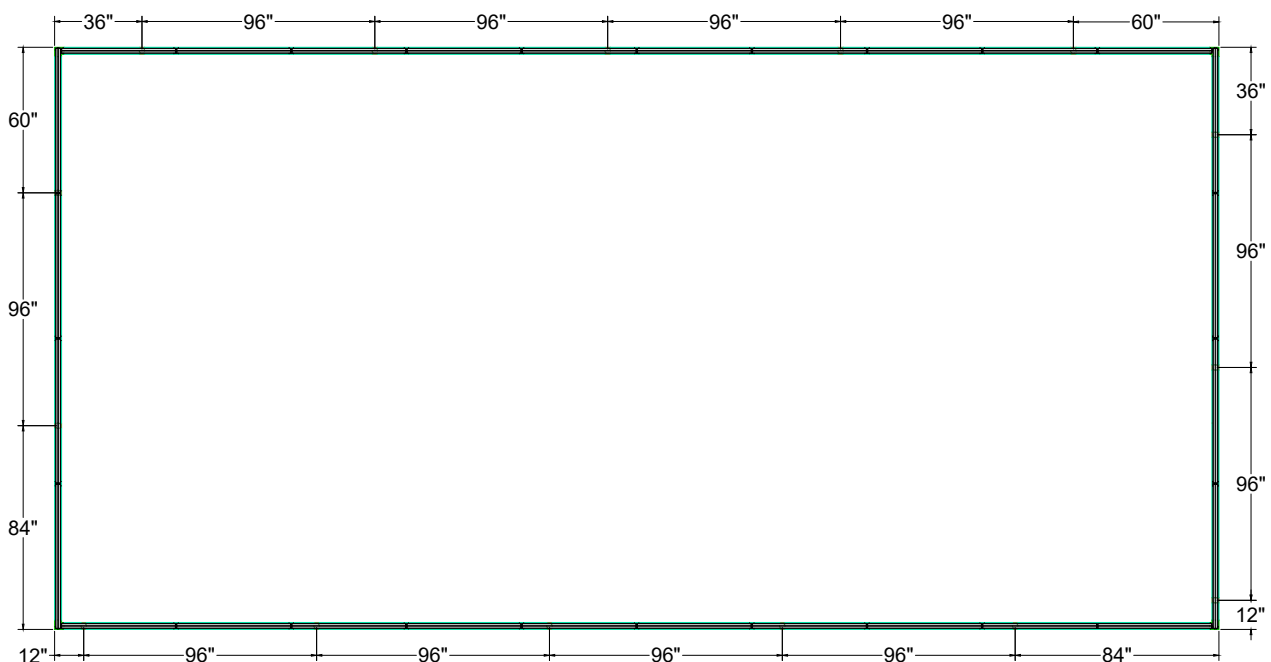

Recommended Models for general outdoor/pool applications include:  
S-AG 38, S-AG 65, S-DG 38, S-DG 65 and S-TIF 65

Component List Example for 20'x 40' Pool Surround with S-TIF 65 SS:

- 8 - TA 6560 SS 60" Tile Insert Frames
- 10 - TA 6548 SS 48" Tile Insert Frames
- 18 - TIF PL TIF Plates
- 13 - G 6596 96" PVC Channels
- 2 - G 6560 60" PVC Channels
- 3 - G 6536 36" PVC Channels
- 15 - S 65 PVC Outlet Sections
- 4 - GAM 65 PVC 90° Angle Joiners

- TA 65 Tile Insert Frame
- G 65 PVC Channel
- GAM 65 90° Angle Joiner
- S 65 PVC Outlet Section

# OUTDOOR

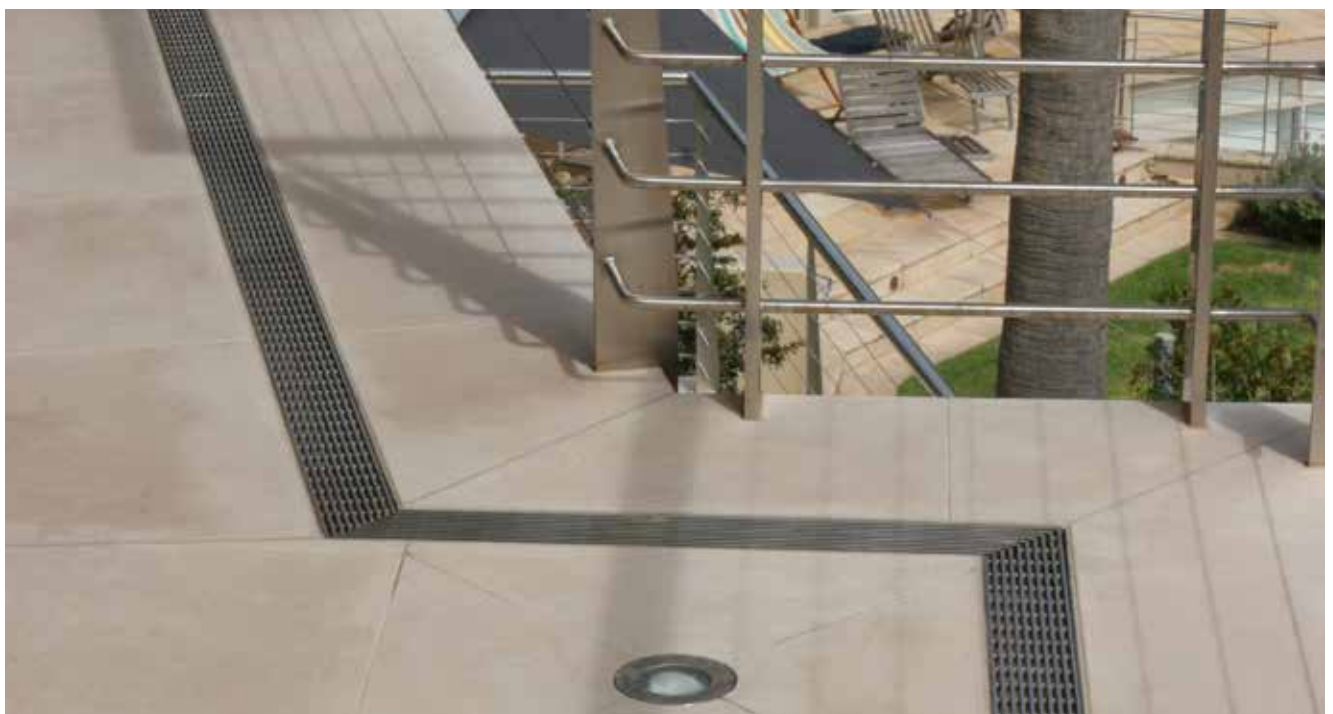

Recommended Models for driveways with light cars:  
S-AG 38 and S-AG 65

Component List Example 15' driveway drain with  
S-AG 65 SS

**Custom Fixed Flange** drains are provided with a 1" flange all sides and can be custom fabricated to the exact length needed and the outlet location placed wherever is specified. For applications with extensive lengths where liquid applied (cold fluid applied) waterproofing is used including balconies, patios, roofs and more.

See page 109 for a custom order form.

# LAVATORY/SINK

**Fixed flange drains may be made to short lengths for use as sink drains** with outlets smaller than the traditional 2", including 1 ½" or 1 ¼" with no-hub or slip fit connections. The channel would be undermounted to the counter/sink top using an epoxy or water resistant adhesive. See Page 110 for a custom form.

# SPA & LOCKER ROOM SHOWERS

**Spas** drains offer an elegant look to compliment the most relaxing enviroments. These drains can be made for use with modern or traditional waterproofing. Extended lengths are available as stock items using our Site Sizable® or as custom fabrication with our Fixed Flange series.

**Locker Room/Fitness** linear drains provide a sleek and functional option for showers that are designed in close proximity. One drain across multiple showers or a trench drain along a corridor of showers will remove water effectively and efficiently.

# FOLDING/SLIDING DOOR SYSTEMS

For use with sliding or folding glass wall and door a custom threshold drain can be used to provide a level entrance. The narrow profile minimizes impact on design, allowing seamless integration between internal and external areas; perfect for creating seamlessly combined indoor/outdoor spaces. Water run-off from the door systems is efficiently captured and drained out through the drain that encapsulates the door track.

# HEALTHCARE

This innovative drainage product allows the use of a linear drain in a vinyl or safety floor environment. It is particularly well adapted for applications in hospitals, commercial kitchens and schools. The vinyl clamp features a stainless steel channel in which a decoratively finished flange mechanically clamps the vinyl in place. All 65 and 125 Series grate styles are available to be made with this option.

# CUSTOM

## Fabrication

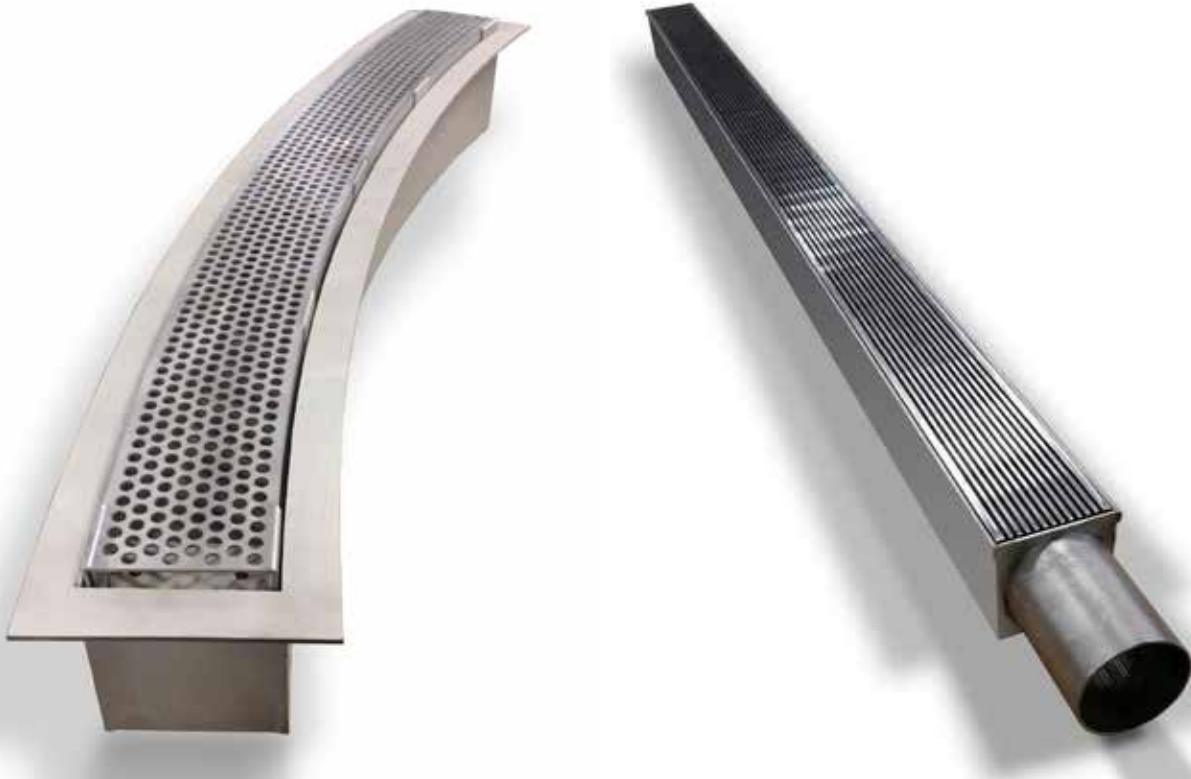

If you can imagine it, we can manufacture it. Infinity Drain™ offers a variety of customized drainage solutions to your exact specification. Customize length, outlets, configuration, styles, and finishes. Please call or email for pricing and availability.

### Customization Options

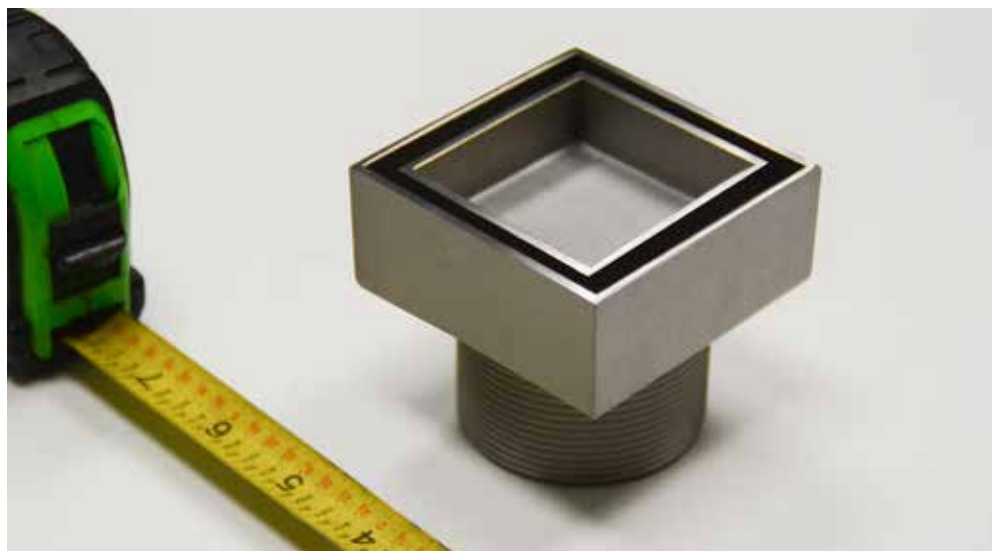

- Installation types: Fixed (FX), Fixed Flange (FF), and Side Outlet (FT)
- Length of linear drain systems up to 300"
- Outlet placement
- Multiple outlets
- Shapes and configurations (please send drawing for quotation)
- Angle joiners for stainless steel Site Sizable (S) channels

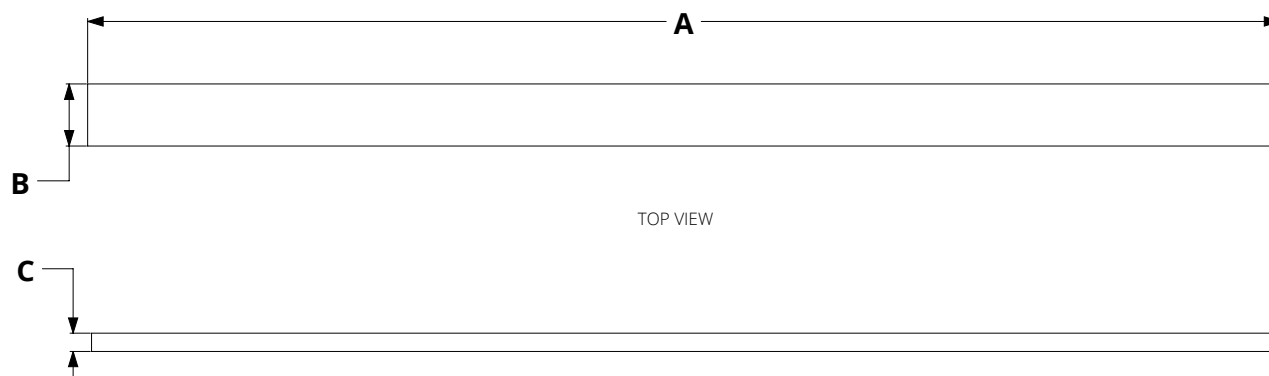

### Custom Fabrication Information

- Linear grates will be made 1/8" shorter than specified custom length to allow for removal
- FX Series custom length is based on the entire grate and channel assembly
- FF and FT Series custom length is based on inside channel dimension
- 1/8" tolerance on custom fabricated products
- Completed custom sheet must accompany purchase order from an authorized dealer
- Rush service available

Not applicable for Rush

\* Custom finishes can be made to match a sample provided by the customer. Contact Infinity Drain for availability of desired finish.

## Rush Fabrication Option: \*5 Business Days (Additional charges will apply)

☐ RUSH

\*Rush fabrication is only applicable to outlet and straight-length modifications and is limited to a total of (10) drains per order. The rush charge is applied per set up. The lead time for lengths up to 108" in standard listed finishes is (5) business days, plus shipping. The lead time for lengths between 108" and 120" in standard listed finishes is 8 business days, plus shipping. The lead time begins the next full business day from when a valid PO and signed custom form is received.

**NOTE:** Wedge wire grates and Tile Insert Frame including (SA 25, SA 38, SA 65, SA 125, A 38, A 65, A 100 and LA 65) can not be fabricated in lengths greater than 72". The Tile Insert Frame TA 65 can not be fabricated in lengths over 60".

## Terms and Conditions:

By signing this form, you are agreeing to the terms and conditions herein. All details and finished stated are correct. All dimensions are correct and are to be held within a tolerance of +/- 1/16". All other details and dimensions that are specified as "standard" are subject to manufacturer's tolerance and change without notice. We can assume no responsibility for use of superceded or void data. All custom orders are non-cancellable, non-returnable and non-refundable.

**[FX]** (Fixed Length) linear drains are designed for use with traditional waterproofing methods including PVC Liners, Rubber Liners, Hot Mop, Lead Pan, Copper Pan and Fiberglass. The overall length of the channel (**A**) is finished length of the drain, which is the outside dimension. All outlet locations (**B**) are measured from the right outside edge. For this installation a mechanically fastening drain body (clamp down drain) must be installed. A mortar bed or equal is spread across the shower area and sloped in all directions towards the clamp down drain body. A waterproofing membrane is installed with the drain body and over the mortar bed. The linear drain is threaded into the drain body and set to the correct height. A final layer of mortar is spread to encase the linear drain and is spread across the shower floor with a slope to the drain. Tile or stone is applied to the final mortar bed.

| A: Overall Length    | B1: Outlet Location 1 | B2: Outlet Location 2 | B3: Outlet Location 3 |

**[FF]** (Flanged) linear drains are designed for use with liquid applied (cold fluid applied) or fabric sheet membranes. The overall inside length of channel (**A**) is the finished length of the drain, with a 1-1/16" flange on all four sides to accept the waterproofing membrane. All outlet locations (**B**) are measured from the right inside channel edge. For this type of installation a mortar bed or equal is created up to and around the drain with the appropriate slope towards the drain. The waterproofing is applied over the mortar bed and the flange of the channel. Tile or stone is applied directly to the waterproofing for a low profile installation. The standard FC channel is provided with a 2" No-Hub Outlet.

Speciality channel options are available.

- **[FCB]** for Double Waterproofing - Comes with a 2" threaded outlet for use with a clamping drain body and a traditional membrane as a primary waterproofing and has the standard 1-1/16" for a liquid/fabric secondary waterproofing.
- **[FCS]** for Schluter KERDI Waterproofing - Comes with KERDI membrane factory applied to the channel for use with the Schluter KERDI system only. Uses a 2" No-Hub Outlet.
- **[FCH]** for Liquid or Fabric Waterproofing only - Comes with a 2" tapered male threaded outlet (MPT) for direct threaded connection to a 2" female (FPT) fitting.

**[FF]** linear drains are typically designed for use with liquid applied (cold fluid applied) or fabric sheet membranes. For a sink application the channel of the drain should be undermounted to the counter top or sink top using an epoxy, waterproof adhesive, or equal. The overall inside length of channel (A) is the finished length of the drain, with a 1-1/16" flange on all four sides to accept the waterproofing membrane. All outlet locations (B) are measured from the right inside channel edge. The angle of the flange under the basin of the sink (D) should be the same as the slope of the basin of the sink. These sink drains are provided with a finished edge that is flush with the height of the decorative grate. This height (E) is typically the same as the thickness of the sink top material. The outlet diameter (F) is available in various sizes and connection types.

Outlet connection types include:

- **No Hub** - Two pipes of the same outside diameter are abutted to each other and joined using a rubber coupling.
- **Slip Fit** - A male tail piece slips into another threaded pipe and is joined together with a slip nut and washer.
- **MPT Threaded** - Outlet of the drain has a male threading that is tapered (MPT) to thread into a tapered female fitting (FPT).

**Rush Fabrication Option: \*5 Business Days** (Additional charges will apply)

☐ **RUSH**

\*Rush fabrication is only applicable to outlet and straight-length modifications and is limited to a total of (10) drains per order. The rush charge is applied per set up. The lead time for lengths up to 108" in standard listed finishes is (5) business days, plus shipping. The lead time for lengths between 108" and 120" in standard listed finishes is 8 business days, plus shipping. The lead time begins the next full business day from when a valid PO and signed custom form is received.

**[FT]** (Side outlet) linear drains are designed for use with liquid applied (cold fluid applied) or fabric sheet membranes. The overall inside length of channel (**A**) is the finished length of the drain, with a 1-1/16" flange on all four sides to accept the waterproofing membrane. All outlet locations (**B**) are measured from the right inside channel edge. For this type of installation a mortar bed or equal is created up to and around the drain with the appropriate slope towards the drain. The waterproofing is applied over the mortar bed and the flange of the channel. Tile or stone is applied directly to the waterproofing for a low profile installation.

Speciality channel options are available.

- **[OCH]** for Threaded Connection - This channel is provided with a 2" male tapered thread (MPT) for direct threaded connection to a female threaded pipe.

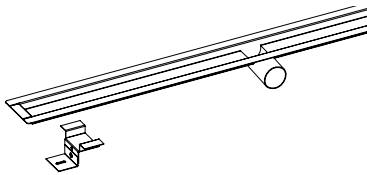

**Rush Fabrication Option: \*5 Business Days** (Additional charges will apply)

# Components

## Channel Spacer

Available for PVC Site Sizable™ Series.

Channel Spacer in placed in the channel during installation to prevent channel flexing. Channel Spacer also acts as a mudguard to prevent debris from entering the Site Sizable™ channel assembly. See specific series installation instructions for more details.

The Channel Spacer can be purchased separately and is included in the G 38 and G 65 channel. It is included in the following kits:

- S-AG 38
- S-AG 65
- S-DG 38
- S-DG 65
- S-LAG 38
- S-LAG 65
- S-LT 38
- S-LT 65
- S-TIF 65

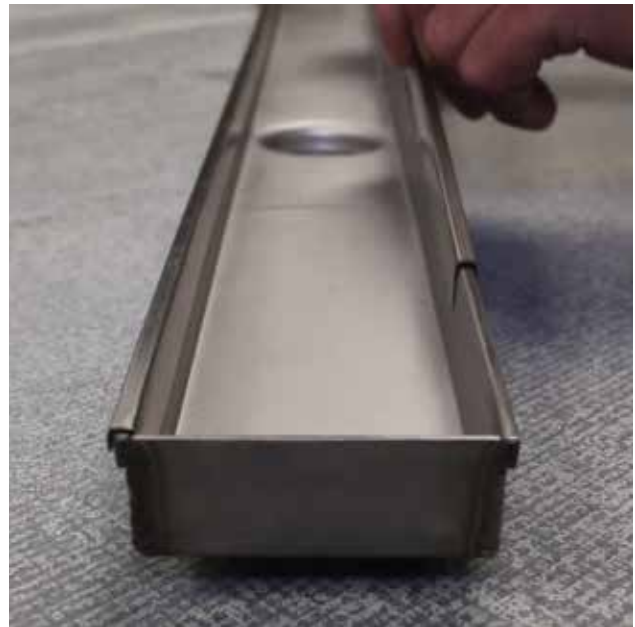

|  | Description                     | Model    | List |
|--|---------------------------------|----------|------|

# Components

## Channel Trim

See installation instructions for full details.

# Components

Channel and Parts for **FX 65**, **FF 65**, **FCS 65**, **FCB 65**, and **FT** series (used with grates on page 124)

(Fixed channel options shown, except FXTIF 65 (page 125), ST series (page 126), and 125 Series (page 127))

**XC 65** Channel for **[FX]** series.

Used with traditional waterproofing. This channel requires a threaded nipple (TNAS), see below. See page 149 for installation details.

A photograph of a shower stall. The walls are covered in a dark, wood-grain patterned material, possibly a composite or veneer, arranged in a grid-like fashion. The floor is made of large, dark, square tiles with light-colored grout. The lighting is dramatic, with strong highlights and deep shadows, creating a modern and textured appearance.

# Icon Explanation

## Drains that are compatible with Traditional Waterproofing

Waterproofing technique can help determine which linear drain series to specify. If using a traditional type of waterproofing, the professional will typically build a shower pan (wet waterproofed area) with PVC, Vinyl, Lead, Hot Mop, Copper or Fiberglass material. Infinity Drain's **[S]** and **[FX]** Series are recommended.

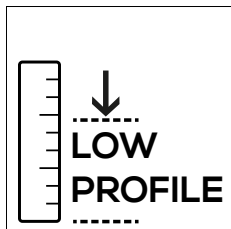

## Drains that are compatible with Liquid/Fabric Waterproofing

Waterproofing technique can help determine which linear drain series to specify. If using a modern type of waterproofing such as liquid membrane or fabric sheet, the professional can more easily waterproof over a greater floor area to build a barrier free or zero threshold installation. Infinity Drain's **[FF]**, **[FCS]** and **[FT]** Series are recommended for this type of waterproofing.

## Site Sizable® Series

Infinity Drain's Site Sizable® linear drains' channels and grates length can be cut on-site for an exact wall-to-wall installation, and the drain outlet can be located anywhere along the channel run. Also Infinity Drain's Site Sizable® linear drains can be joined together to create infinite lengths for outdoor and indoor applications. We offer threaded and non-threaded outlets, 90° angle joiners, straight joiners, and custom fabrication.

## Site Sizable® Low Profile Series

Infinity Drain's Site Sizable® linear drains' channels and grates length can be cut on-site for an exact wall-to-wall installation, and the drain outlet can be located anywhere along the channel run. The new lower profile series reduces the PVC channel height from 1-5/8" to 1" and allows for easier installation of barrier free showers.

## High Flow Drains

High flow drains are designed to connect to a 3" waste line. These drains are rated at 21 GPM and are ideal for showers that have multiple shower heads or body sprays.

# Installation

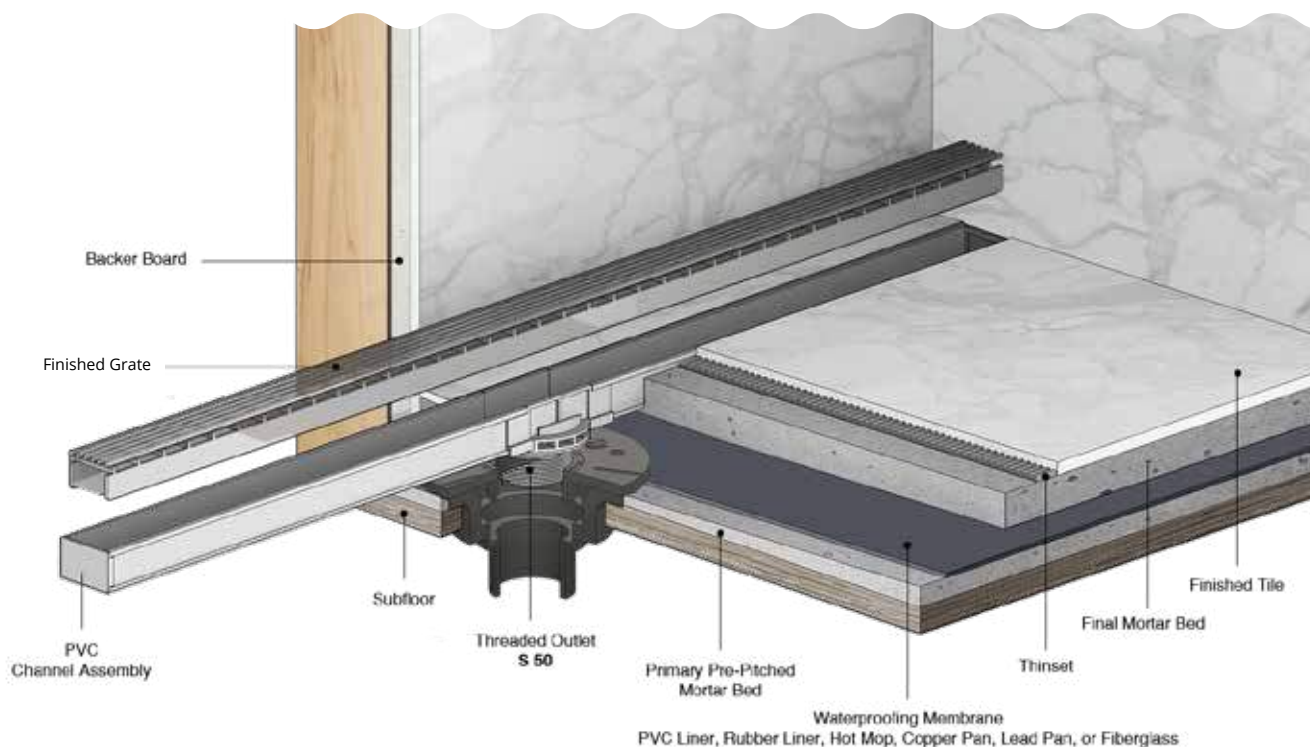

## Site Sizable PVC

### Installation

For an exact wall-to-wall installation. The channel and grate length can be cut on-site, and the drain outlet can be located anywhere along the channel run. Available in kit lengths or sold as individual components.

#### Waterproofing via clamping floor drain:

- ° Copper Pan
- ° Hot Mop
- ° PVC Liner
- ° Fiberglass
- ° Lead Pan
- ° Rubber Liner (Chloraloy®)

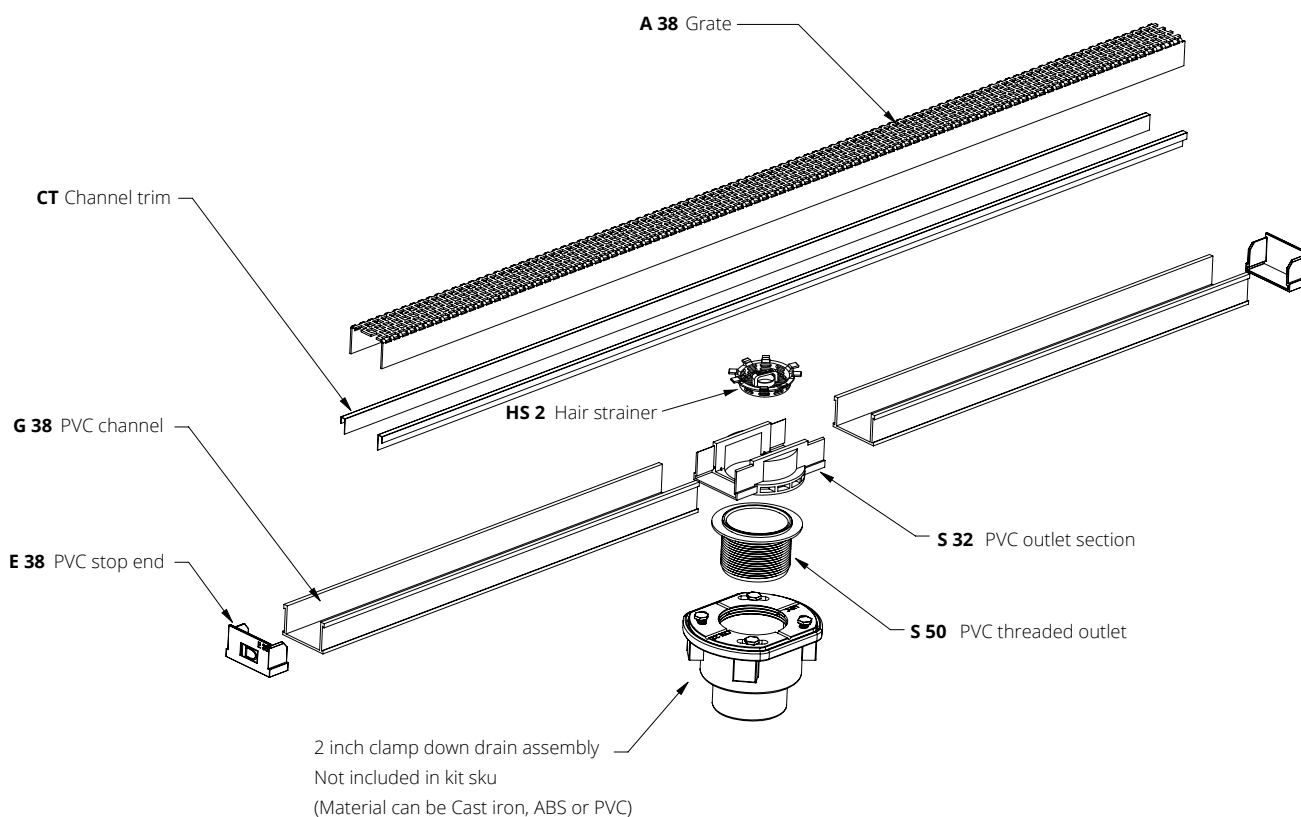

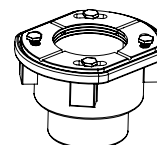

# Installation

## Site Sizable PVC

### Complete Kits Include

Grate, PVC Channel, PVC Stop Ends, PVC Outlet Section(s), PVC Threaded Outlet(s), Channel Trim, Hair Strainer(s), and Lift-Out Key.

- Requires 2" clamping floor drain with 2" throat  
Not included in complete kit.

## Stainless Steel Shower Base

### Installation

A one piece stainless steel shower base with integral drain in standard sizes or custom fabrication is available. Shower floor sets shower framing for exact wall to wall installation.

Stainless steel shower base is completely waterproof.  
Additional waterproofing on wall is optional.

# Installation

## Stainless Steel Shower Base

### Lifetime Guarantee

Covers labor, removal, replacement and restoration.

See page 182-184 for warranty details.

With a 6" sleeve on foundation, the 2" no hub connection through slab allows for 2" variance in any direction. Factory flood tested as per UPC and IPC standards.

Plumbing code compliant for use as prefabricated shower receptor. IAPMO tested to IAPMO PS-106-2015 standard.

# Linear Drain Guide

## General Installation Guidelines

Whether it is a barrier threshold (curb), or barrier free (curbless/zero threshold) installation, Infinity Drain™ has provided general guidelines below to assist in determining the correct product choice for your project.

### FLOOR PITCH DIRECTION

## Site Conditions

Whether it is a renovation or new construction, choosing where to locate a linear drain is contingent on the waste line location, which may be predetermined or already installed. Moving a waste line may be possible, depending on site conditions. Infinity Drain's™ Site Sizable™ [S] Series provides flexibility during the installation process by allowing the outlet to be placed anywhere along the channel run. Always consult with a licensed professional.

## Locating Linear Drains

A linear drain allows for the use of larger format floor tile and the ability to pitch the floor in one direction. This offers an advantage from the traditional center drain installation, where the floor must slope in four directions in order to properly drain the water.

# Linear Drain Guide

## General Installation Guidelines

Fig 1: Wall-to-Wall

Fig 2: NOT Wall-to-Wall

Fig 3: Against a Wall

Fig 4: Threshold Install

Fig 5: Threshold Install

## Type of Install

### Wall-to-Wall (Fig 1, Fig 2)

One way to ensure proper drainage is to install the linear drain from wall-to-wall. The challenge of this installation is that it requires an exact dimension. Infinity Drain offers a solution to this issue with the Site Sizable™ **[S]** Series, which allows for “site sizing” the length of the drain by cutting the grate and channel to the exact finished wall-to-wall dimension. Infinity Drain’s **[FX]** **[FF]** **[FT]** & **[FCS]** Series can be custom fabricated for the exact desired length and outlet location.

### Against a Wall (Fig 3)

Infinity Drain’s Fixed Flange (**[FF]** & **[FCS]**, bottom outlet and Side Outlet **[FT]**, horizontal or side outlet) Series are designed for flush against the wall installations. These series are intended for use with liquid or fabric sheet waterproofing to tie into the wall board. They are available with a center outlet location and in set lengths of 24”, 32”, 36”, 42”, 48”, and 60.” Custom sizes and outlet locations are available.

The **[S]** Site Sizable and Fixed **[FX]** Series require a traditional clamping floor drain body for PVC/Vinyl Liner, Rubber Liner, Lead Pan, Copper Pan, Fiberglass, and Hot Mop type waterproofing. The diameter of the clamping floor drain body creates a challenge for flush against the wall installations. If using these series Infinity Drain recommends three options to help properly achieve against the wall installations:

1. Build out the back wall with a double layer of wall board.
2. Use the **[FF]** , **[FCS]** or **[FT]** Series for exact against the wall installation.

### Curb or Curbless (Fig 3, 4, and 5)

Deciding between a barrier threshold (curb) or barrier free (curbless) installation is critical when a linear drain is being considered. Please consult a licensed professional when determining which installation is possible. Please see Barrier Free on pages 171-175 for more information.

### Threshold Installation (Fig 4 and 5)

For threshold installs, we recommend the drain run exactly wall-to-wall to block any water from leaving the shower or wet area. We do not recommend linear drains less than 2” wide or Tile Insert Frame drains for threshold installations without a curb due to the lack of channel width needed to sufficiently catch the water.

### Barrier Free Installation (Fig 4 and 5)

Installing a shower drain without a curb, barrier, or threshold creates a seamless look with easy accessibility to the wet area. To achieve an ideal installation, floor heights should be equal between the shower area (wet area), outside the shower (dry area), and next room. Details on pages 171-175.

# Linear Drain Guide

## General Installation Guidelines

### Flow Rates

There are many variables that influence flow rates and how drains perform. Our listed GPM (gallons per minute) on Infinity Drain™ products are based on having a "head of water" that is traveling at ½" high. Different head heights will change flow rate. Without calculating a specific install, use our flow rate as a general guideline. The following variables should be considered when choosing and locating a linear drain.

#### VARIABLES TO CONSIDER:

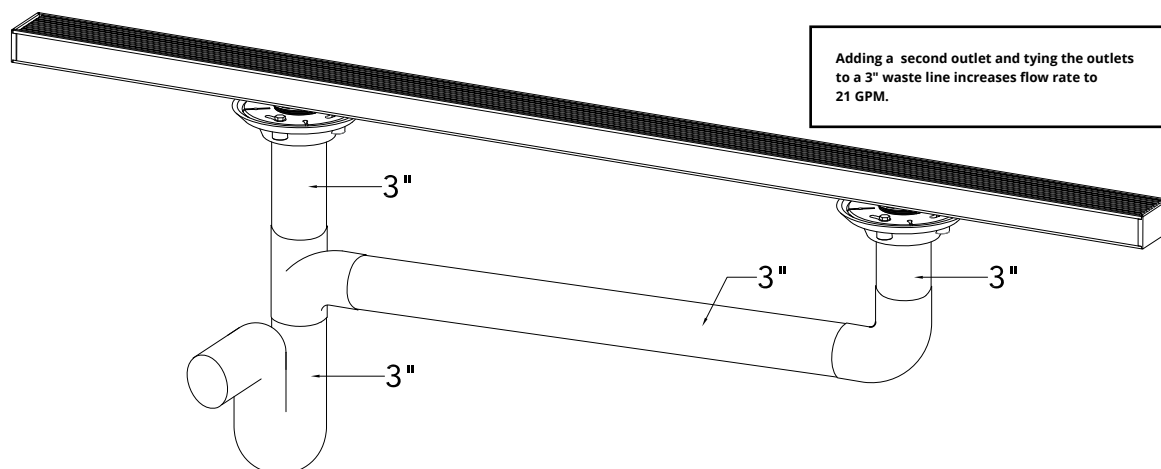

- What is flow rate of the shower valve? (i.e. how much water is being drained?)
- Are there multiple shower valves?
- What is the water pressure or PSI of the site location?
- How many water features? (i.e. shower heads, hand shower, body sprays, etc.?)
- Will the fixtures operate at the local plumbing code's legal gallons per minute?
- Will the flow restrictors be removed from the fixtures?

The answers to the above questions fall into the equation of determining the proper type of drain, outlets necessary, and location of the drain. These variables can vary drastically from installation to installation, and because of this, it is difficult to have an absolute flow rate. Most US residential installations use a 2" waste line, which has an average capacity of 9 GPM at ½" head of water, assuming proper venting. Adding additional 2" outlets and tying them to a 3" waste line will significantly increase the flow rate to 21 GPM. Infinity Drain's 3" outlet products have an average capacity of 21 GPM.

### Outlets

Infinity Drain products are intended for both indoor and outdoor use. For indoor installations, we recommend an outlet every 30". For example, on a 60" length drain, if the outlet is centered, it is considered to have 30" on either side. In the same example, if the outlet is offset 5" to one side, we would recommend a secondary outlet, especially for a zero-threshold installation. Our 72", 80", and 96" complete

kits come standard with two outlet assemblies. The Site Sizable **[ S ]** Series can add additional outlet components to the kit. Custom fabrication with multiple outlets is available on the **[FX]**, **[FF]**, **[FCS]**, **[FCB]** and **[FT]** linear drain Series. Outdoor installations: Outlet frequency is dependent on drain application and geographic location. Please contact us with questions regarding your specific installation.

# Linear Drain Guide

## General Installation Guidelines

### Waterproofing

Waterproofing technique can help determine which linear drain series to specify. If using a traditional type of waterproofing, the professional will typically build a shower pan (wet waterproofed area) with PVC, Vinyl, Lead, Hot Mop, Copper or Fiberglass material. Infinity Drain's **[S]** and **[FX]** Series are recommended. If using a modern type of waterproofing such as liquid membrane or fabric sheet, the professional can more easily waterproof over a greater floor area to build a barrier free or zero threshold installation. Infinity Drain's **[FF]**, **[FCS]**, and **[FT]** Series are recommended for this type of waterproofing. Complete shower systems such as the USG™ Durock™ Brand Infinity Drain™ Shower System utilize fabric sheet waterproofing and a pre-sloped foam floor to achieve a fully waterproofed shower solution.

#### USING A CLAMPING FLOOR DRAIN/TILE FLOOR DRAIN:

##### PVC Membrane/Vinyl Liner (Polyvinyl Chloride)

A plastic sheet available at most plumbing suppliers and sold in rolls of 4', 5' and 6'. The membrane is layered between mortar beds and the corners are folded to create the shower pan liner. If the shower pan area is larger than the roll dimension, it must be seamed or joined together.

##### Lead Pan/Copper Pan

A metal sheet that is formed to create the shower pan area. The membrane is layered between mortar beds and the corners are folded to create the shower pan liner. If the shower pan area is larger than the sheet dimension, the lead material must be welded together. This install is more common in metropolitan areas where code may require a metal pan.

##### CPE Membrane (Chlorinated Polyethylene)

A rubber sheet available at most plumbing suppliers and sold in rolls of 4', 5' and 6'. The membrane is layered between mortar beds and corners are folded to create the shower pan liner. If the shower pan area is larger than the roll dimension, it must be seamed or joined together. CPE Membrane is also branded as Chloraloy® by Noble.

##### Hot Mop (Tar)

Heated liquid tar is applied or "mopped" on the shower area to create the shower pan and is similar to waterproofing a roof with tar. This installation is most common in California. Similar to fiberglass waterproofing.

#### USING A BONDED FLANGE:

##### Liquid

Roll or paint-on liquid membrane that can be applied on floors, walls, and ceilings and bonds directly to the drain flange. The total install time is shorter than traditional waterproofing methods and typically saves 2 to 3 days.

##### Fabric Sheet

Sheet membrane that bonds directly to the drain flange with an adhesive is sold by most tile suppliers. Corners (in and out) are available to avoid folding. If the shower pan area is larger than the roll dimensions, it must be seamed or joined together. Tile can bond directly to waterproofing.

# Linear Drain Guide

## Barrier Free Installation

Installing a shower drain without a curb, barrier, or threshold creates a seamless look with easy accessibility to the wet area. To achieve an ideal installation, floor heights should be equal between the shower area (wet area), outside the shower (dry area), and next room. Specific conditions will determine what is involved.

### Linear Drain Placement

For a barrier free installation the most important factor to consider is the drain placement. The placement will affect installation and design options, build up amount and depression amount.

BACK WALL - parallel to shower entrance on opposite wall. (page 172)

THRESHOLD - parallel to shower entrance and along the entrance wall. (page 173-174)

SIDE WALL - perpendicular to shower entrance. (page 175)

### Installation and Design Options

Installing a shower drain without a curb, barrier, or threshold creates a seamless look with easy accessibility to the wet area. To achieve an ideal installation, floor heights should be equal between the shower area (wet area), outside the shower (dry area), and next room.

### Minimum Build Up at the Entrance of the Shower

Minimum build up at the entrance of the shower is calculated to determine if and how much the shower area must be depressed for a barrier free installation.

### Waterproofing Method

The type of waterproofing will affect the amount of build up because of the height of the compatible drain and waste line connection type.

TRADITIONAL WATERPROOFING:  
(PVC/Vinyl Liner, Lead/Copper Pan, Hot Mop, Rubber Liner, Fiberglass)

Traditional waterproofing has a larger overall build up due to taller channels and a clamp down drain installation. The channel height ranges from 1-7/16" to 2-3/8".

LIQUID/FABRIC WATERPROOFING:  
(Liquid Applied or Fabric Sheet Membrane)

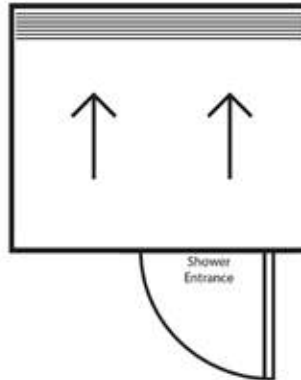

Liquid/ Fabric waterproofing installations have less overall build up due to shallow channels and a no hub installation. The channel height ranges from 13/16" to 7/8".

# Linear Drain Guide

## Barrier Free Installation

### LINEAR DRAIN PLACEMENT:

#### PARALLEL TO SHOWER ENTRANCE BACK WALL

### INSTALLATION AND DESIGN OPTIONS:

- Most flexible installation option
- Can be installed wall to wall, flush against the wall, or off of the walls
- Stock sizes can be used
- Any grate style can be used

The minimum buildup for a back wall installation is dependent on the depth of the shower and degree of slope.\*

Example: 4' x 4' shower with a slope of 1/4" per foot would have a slope of 1".

### WATERPROOFING METHOD:

#### TRADITIONAL WATERPROOFING

Drain Channel Height  
Above Subfloor  
+ (Shower Depth (A) x 0.25)  
= Height at entrance  
of shower

**2-7/16" to 3-3/8"**  
(Varies by model)

#### LIQUID/ FABRIC WATERPROOFING

Drain Channel Height  
Above Subfloor  
+ Tile Thickness  
+ Thinset Thickness  
+ (Shower Depth (A) x 0.25)  
= Height at entrance  
of shower

**2-5/16" to 2-3/8"**  
(Varies by model)

### MINIMUM BUILD UP :

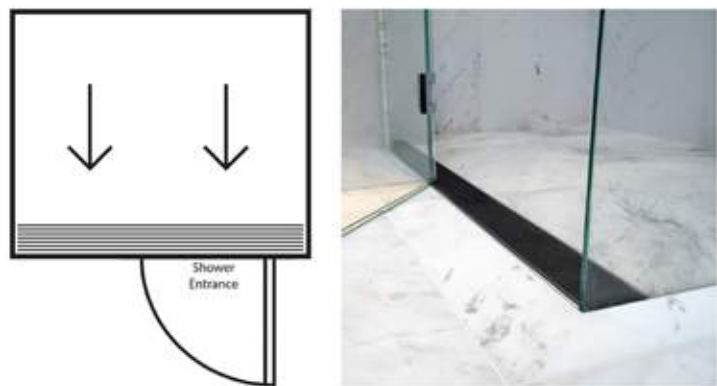

\*NOTE: Installer must verify all rough-in dimensions prior to installation and consult local and national codes. Conformity and compliance to local and national codes are the responsibility of the installer.

# Linear Drain Guide

## Barrier Free Installation

### LINEAR DRAIN PLACEMENT:

PARALLEL TO SHOWER ENTRANCE  
THRESHOLD

### INSTALLATION AND DESIGN OPTIONS:

- Least amount of overall build up at the entrance of the shower - ideal for dealing with height restrictions
- Must be installed wall to wall
- Must work within stock dimensions, Site Sizable, or custom drain
- Narrow grate styles and Tile insert frames can not be used

The minimum buildup for a back wall installation is dependent on the height of the drain above the slab/subfloor.\*

### WATERPROOFING METHOD:

### MINIMUM BUILD UP :

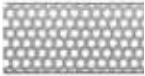

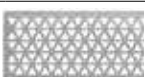

| TRADITIONAL<br>WATERPROOFING                                                                                | LIQUID/ FABRIC<br>WATERPROOFING                                                                                                                                      |

\*NOTE: Installer must verify all rough-in dimensions prior to installation and consult local and national codes. Conformity and compliance to local and national codes are the responsibility of the installer.

# Linear Drain Guide

## Barrier Free Installation

For threshold installs, we recommend the drain run exactly wall-to-wall to block any water from leaving the shower or wet area. We do not recommend thinner or tile-in type drains for threshold installations due to the lack of channel width needed to sufficiently catch the water. The FF, FCS, and FT series offer the lowest overall heights. In addition, we offer a product (ST 65 - pg 140) to allow channel to recess into subfloor an additional ¾". The dry side of the shower should have a slight pitch towards the linear system to ensure proper drainage. The entire wet and dry floor area should be waterproofed. Infinity Drain recommends working with a licensed professional who is familiar with local codes and installation requirements. The recommended models for a barrier free threshold installation are highlighted in pink below.

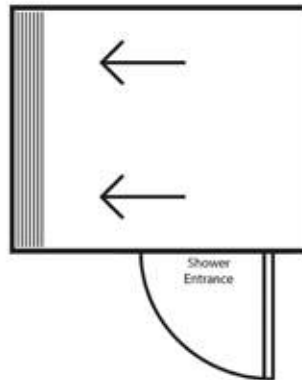

| GRATE STYLES          |                                                                                     | Site Sizable [S]                                  | Fixed Length [FX] | Fixed Flange [FF]             | Side Outlet [FT] | Flange with Schluter® Kerdi [FCS] | Double Waterproofing [FCB]           | Universal [U]                       |

# Linear Drain Guide

## Barrier Free Installation

### LINEAR DRAIN PLACEMENT:

#### PERPENDICULAR TO SHOWER ENTRANCE SIDE WALL

### INSTALLATION AND DESIGN OPTIONS:

- Usually the most amount of build up
- Can create pitch challenges between wet and dry area
- Can be installed wall to wall, flush against the wall, or off of the walls
- Stock sizes can be used

Slab/subfloor must be depressed to allow the finished surface of the shower floor to be  $\frac{1}{2}$ " -  $\frac{5}{8}$ " below the finished surface of the dry area.\*

Example: 4' x 4' foot shower with a slope of  $\frac{1}{4}$ " per foot would have a slope of 1".

### WATERPROOFING METHOD:

#### TRADITIONAL WATERPROOFING

Drain Channel Height  
Above Subfloor  
+ (Shower Depth (A) x 0.25)  
+  $\frac{1}{2}$ "  
= Height at entrance  
of shower

**2-15/16" to 4-7/8"**  
(Varies by model)

#### LIQUID/ FABRIC WATERPROOFING

Drain Channel Height  
Above Subfloor  
+ Tile Thickness  
+ Thinset Thickness  
+ (Shower Width (B) x 0.25)  
+  $\frac{1}{2}$ "  
= Height at entrance  
of shower

**2-13/16" to 2-7/8"**  
(Varies by model)

### MINIMUM BUILD UP :

\*NOTE: Installer must verify all rough-in dimensions prior to installation and consult local and national codes. Conformity and compliance to local and national codes are the responsibility of the installer.

# Glossary

|                                   |                                                                                                                                                                                                                   |
|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>ABS</b>                        | Type of plastic used for waste and drain fittings. Acrylonitrile butadiene styrene, commonly abbreviated ABS. Usually black in color.                                                                             |
| <b>ABS Primer / Glue</b>          | Primer - Substance used to prep or clean pipe prior to gluing (see solvent weld). ABS Glue is specifically used for ABS to ABS connections.                                                                       |
| <b>ADA Shower</b>                 | A shower that meets requirements set by the Americans with Disabilities Act. Specific standard to floor drains requires the threshold or barrier transition for a roll-in shower to be no greater than 1/2" high. |
| <b>Barrier Free Shower</b>        | A shower area without a curb or threshold to step over. Also called curbless.                                                                                                                                     |
| <b>Bolt Pattern</b>               | Top ring of a clamping floor drain. Bolt patterns can vary by drain manufacturer. ID makes universal clamping plates to accomodate exsisting clamping floor drains. (see UCP 2 and UCP 4 pg 116)                  |
| <b>Bonded Flange</b>              | A drain body used for liquid membrane or fabric sheet waterproofing.                                                                                                                                              |
| <b>Cast Iron</b>                  | A ferrous type of iron used in plumbing for waste pipes and drain bodies.                                                                                                                                         |
| <b>Center Pitch (4-Way Pitch)</b> | Traditional tiled shower floors are pitched towards the center in four directions to allow proper drainage. If not pitched properly, water pools in areas of the shower.                                          |
| <b>Channel</b>                    | The bottom portion of a linear drain. Also called trench, trough, channel body.                                                                                                                                   |
| <b>Clamping Floor Drain</b>       | Type of mechanically fastening floor drain that allows you to "clamp down" a PVC liner, Chloraloy liner, Lead Pan, Copper Pan, Fiberglass, or Hot Mop waterproofing methods.                                      |
| <b>Curb</b>                       | Dam built to contain a shower area. Code specifies a minimum of 2" and a maximum 9" above the elevation of the finished drain.                                                                                    |
| <b>Drain Connection Types</b>     | Method in which the drain body connects to waste line. (see No Hub, FIP, Inside Caulk and Slip Fit Connection)                                                                                                    |
| <b>End Caps</b>                   | Component used to close the end of a channel assembly. PVC for S-AG, S-DG, and S-TIF Series. Stainless Steel for S-AS, S-DGAS, and S-TIFAS Series.                                                                |
| <b>FIP</b>                        | Female Iron Pipe - A female iron connection with a tapered thread that thins out to the end of the pipe. When tightened, the ever-decreasing thread depth makes the connection watertight.                        |
| <b>Fixed (FX)</b>                 | ID product series that is "Fixed" with a straight edge channel. Fixed models cannot be modified on site. This product uses "Traditional" waterproofing methods.                                                   |
| <b>Fixed Flange (FF)</b>          | ID product series that is "Fixed" with a "Flanged" channel and bottom outlet. Fixed models cannot be modified on site. This product uses "Modern" waterproofing methods.                                          |
| <b>Fixed Tunnel (FT)</b>          | ID product series that is "Fixed" with a "Flanged" channel and side outlet. Fixed models cannot be modified on site. This product uses "Modern" waterproofing methods.                                            |
| <b>Floor Pitch / Slope</b>        | Floor height change to allow proper drainage. Standard pitch is 1/4" (2% slope) per foot and not more than 1/2" (4% slope) per foot towards the drain. International pitch 1/8" (1%) per foot.                    |

# Glossary

|                              |                                                                                                                                                                                                                      |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Flow Rate</b>             | Amount of water that passes through the drain at the outlet. Calculated in gallons per minute (GPM).                                                                                                                 |
| <b>GPM</b>                   | Gallons Per Minute                                                                                                                                                                                                   |
| <b>Grate</b>                 | The decorative top portion of a linear drain. Also called top grate, strainer, top grid, drain cover.                                                                                                                |
| <b>Grate Free Area (GFA)</b> | Total area not covered by the grate. Calculated by determining area of opening on the top grate/strainer multiplied by the number of openings.                                                                       |
| <b>Head of water</b>         | The total energy at a given point in a fluid. Expressed in units of height.                                                                                                                                          |
| <b>Hot Mop</b>               | Waterproofing technique using liquid hot tar that cools to become a waterproof shower pan.                                                                                                                           |
| <b>Inside Caulk</b>          | Type of floor drain connection that fits over the waste pipe. It is packed with an oakum and is further sealed using molten lead.                                                                                    |
| <b>Joiners</b>               | Straight or 90 degree joiners used to connect channel lengths together. PVC for S-AG, S-DG, and S-TIF Series. Stainless Steel for S-AS, S-DGAS, and S-TIFAS Series.                                                  |
| <b>Modern Waterproofing</b>  | Liquid membrane or fabric sheet waterproofing methods. Waterproofing is attached or painted onto the flange. Fixed Flange (FF), Flange Tunnel (FT), or Bonded Flange center drain.                                   |
| <b>No Hub</b>                | Type of floor drain connection where two pipes are connected with a rubber coupling (Fernco™).                                                                                                                       |
| <b>NPS</b>                   | Nominal Pipe Size (NPS) - North American set of standard sizes for pipes. Pipe size is specified with two non-dimensional numbers: diameter based on inches and a schedule (Sched. or Sch.) for pipe wall thickness. |
| <b>NPT</b>                   | National Pipe Thread Taper (NPT) - A U.S. standard for tapered threads used on threaded pipes and fittings.                                                                                                          |
| <b>Outlet</b>                | Open area where water exits the drain or channel.                                                                                                                                                                    |
| <b>Outlet Section</b>        | Component section of channel with a punch for the outlet. Specific to the S-AG 38, S-DG 38, S-AG 65, S-DG 65, S-TIF 65, S-AS 65, S-DGAS 65, and S-TIFAS 65 Series.                                                   |
| <b>Outlet Assembly</b>       | Component section of channel that includes the outlet section welded to the threaded nipple for connection to the clamp down floor drain. Specific to the S-DGAS 99, S-AS 99, and S-TIFAS 99.                        |
| <b>PVC</b>                   | A type of plastic used for waste and drain fittings. Polyvinyl chloride, commonly abbreviated PVC. Usually white or gray in color.                                                                                   |
| <b>PVC Primer/ Glue</b>      | Primer - Substance used to prep or clean pipe prior to gluing (see solvent weld). PVC Glue is specifically used for PVC to PVC connections.                                                                          |
| <b>Rescue Nipple</b>         | A longer version of the Threaded Nipple up to 4" used when the clamp down floor drain body is too deep in the subfloor.                                                                                              |

# Glossary

|                                      |                                                                                                                                                                                                        |
|--------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Rubber Coupling</b>               | A tubular flexible rubber device that joins two pipes together by tightening fastening clamps to create a watertight connection. Used to make a "No Hub" connection. Also known as a Fernco™.          |
| <b>Shower Pan</b>                    | Waterproofed area in a shower enclosure.                                                                                                                                                               |
| <b>Side Outlet</b>                   | An outlet that is horizontal going parallel to the floor. Used to move waste lines with limited flexibility on site.                                                                                   |
| <b>Single Plane Pitch</b>            | Shower floors pitched in one plane towards the linear drain channel. Used instead of a four-way pitch, common for a center drain.                                                                      |
| <b>Site Sizable™ (S)</b>             | ID product series that can be cut to length on site as well as locate the outlet anywhere on the channel run.                                                                                          |
| <b>Slip Fit Connection</b>           | Type of floor drain connection for PVC and ABS fittings. One piece "slips" into the other snugly and is sealed (solvent weld) using appropriate glue type (ABS Glue or PVC Glue).                      |
| <b>Solvent Weld</b>                  | A molecular bond that fuses plastic to create a watertight seal. The fitting is primed (cleaned) then glued (welded) together using a material specific glue (ABS Glue or PVC Glue).                   |
| <b>Stainless Steel</b>               | A steel alloy used to make Infinity Drain grates and channels. Defined as a steel alloy with a minimum of 10.5% to 11% chromium content by mass.                                                       |
| <b>Strainer</b>                      | The decorative top portion of a drain. The overall dimension and shape may vary. The critical dimension to connect to the drain body is the strainer throat size.                                      |
| <b>Strainer Throat</b>               | A threaded male connection from the strainer. Threads into a drain body.                                                                                                                               |
| <b>Sub-Floor</b>                     | The material below a finished floor. Generally plywood or concrete.                                                                                                                                    |
| <b>Threaded Nipple</b>               | A threaded cylinder used to connect the linear drain channel to the clamp down floor drain.                                                                                                            |
| <b>TIF</b>                           | Tile Insert Frame - A decorative grate that has an open area to add finished flooring material. Water drains into the channel via a 1/4" gap on all sides.                                             |
| <b>TIF Plates</b>                    | A set of stainless steel plates used to reconnect shortened segments of a tile insert frame grate. Included in Site Sizable™ S-TIF and S-TIFAS Series complete kits.                                   |
| <b>Tile Insert</b>                   | ID center pitch drain that allows tile to be placed inside the center frame. TD, TDB, LTD, RTD Series.                                                                                                 |
| <b>Top Ring/<br/>Drain Throat</b>    | A threaded female connection top ring that bolts to body of clamp down floor drain. Infinity Drain offers universal clamping plates to accommodate existing floor drains. (see UCP 2 and UCP 4 pg 116) |
| <b>Traditional<br/>Waterproofing</b> | PVC liner, Chloraloy liner, Lead Pan, Copper Pan, Fiberglass or Hot Mop waterproofing methods with a clamp down floor drain.                                                                           |

# Glossary

|                       |                                                                                                                                                                                    |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Wall Build-Out</b> | Adding additional backer board and/or packing out a wall with additional material to create a flush against the wall installation for the Site Sizable™ (S) and Fixed (FX) Series. |
| <b>Wedge Wire</b>     | A high grade 316L stainless steel, welded, longitudinal decorative grid grate used on the WD 5, WDB 5, S-AS, S-AG, FXAS, FFAS, and FTAS Series.                                    |
| <b>Weep Holes</b>     | Holes on a clamp down floor drain intended to “weep” away water below a tiled floor. During installation it is important these do not get clogged by mortar or thinset.            |

# Terms and Conditions

## Applicability

These terms and conditions ("Terms") are the only terms which govern the sale of the merchandise by Infinity Drain Ltd. ("Infinity Drain") to the dealer and/or customer purchasing the merchandise (in either such case, the "Recipient"). Notwithstanding anything herein to the contrary, if a written contract signed by both parties is in existence covering the sale of the merchandise covered hereby, the terms and conditions of said contract shall prevail to the extent they are inconsistent with these Terms.

The accompanying invoice and these Terms comprise the entire agreement between the parties, and supersede all prior or contemporaneous understandings, agreements, negotiations, representations and warranties, and communications, both written and oral. These Terms prevail over any of the Recipient's general terms and conditions of purchase regardless whether or when such Recipient has submitted its purchase order or such terms. Fulfillment of a Recipient order does not constitute acceptance of any of the Recipient's terms and conditions and does not serve to modify or amend these Terms.

## Price and Payment Terms

The Recipient shall purchase the merchandise from Infinity Drain at the price(s) (the "Price(s)") set forth in Infinity Drain's published price book in force as of the date that Infinity Drain accepts Recipient's purchase order.

All Prices are exclusive of all sales, use and excise taxes, and any other similar taxes, duties and charges of any kind imposed by any governmental authority.

Recipient shall pay all invoiced amounts due to Infinity Drain within thirty (30) days of issuance of Infinity Drain's invoice. Recipient shall make all payments hereunder by wire transfer/check/credit card/ACH payment and in U.S. dollars (and in Canadian dollars (CAD) for Recipients located in Canada). Credit card transactions are subject to a two-and-a-half percent (2.5%) processing fee. Recipient shall pay interest on all late payments at the lesser of: (i) the rate of one-and-a-half percent (1.5%) per month, or (ii) the highest rate permissible under applicable law, calculated daily and compounded monthly.

Recipient shall reimburse Infinity Drain for all costs incurred in collecting any late payments, including, without limitation, court costs, collection agency fees and/or attorneys' fees. Administrative fees of fifteen percent (15%) will be added to the interest charges on all overdue accounts when payment is obtained through a collection agency. In addition to all other remedies available under these Terms or at law (which Infinity Drain does not waive by the exercise of any rights hereunder), Infinity Drain shall be entitled to suspend the delivery of any merchandise if Recipient fails to pay any amounts when due hereunder and such failure continues for five (5) days following written notice thereof. Recipient shall not withhold payment of any amounts due and payable by reason of any set-off of any claim or dispute with Infinity Drain, whether relating to Infinity Drain's breach, bankruptcy or otherwise.

# Terms and Conditions

## Limited Lifetime Warranty

This Limited Lifetime Warranty is extended only to the original purchaser of the unit under warranty and is valid only when bought through and registered by an authorized Infinity Drain retailer.

## Exclusions

The above-stated limited lifetime warranty applies as long as damage is not caused by an accident, abuse, misuse, fire, insects, use of abrasive products or an act of God. Transport, handling or installation damages are also excluded. Any part that must be changed during the warranty period will be covered by the original warranty or for a two (2) year period following replacement, according to the first contingency.

## Procedure

Any defect involving the manufacturer's liability shall be reported to Infinity Drain within ten (10) days of its occurrence. Drains claimed to be defective shall be held until inspected by an authorized representative of Infinity Drain, and upon their specific instructions, drains found to be defective will be repaired and replaced at Infinity Drain's choice. The liability of Infinity Drain with respect to the sale of this drain shall be limited to repair or replacement by a similar product as provided above and does not include any cost of removal, reinstallation, transport of defective product, loss of time, salary or any other expenses as well as any consequential damages of any kind. Infinity Drain and its representatives shall not be held liable for any injury, loss, cost or other damage, whether consequential or incidental, that arise from any defect covered under this limited warranty, even if Infinity Drain has been advised of the possibility of such damage.

## Limitations

This Limited Lifetime Warranty replaces all other warranties, expressed or implied, in face or at law, including implied warranties of merchantability and fitness for a particular purpose. The terms of this limited warranty cannot be modified or extended in any way whatsoever by any agency, dealer, distributor, service company or other party other than Infinity Drain.

## Legal Rights

This Limited Warranty gives specific legal rights and is not applicable if it interferes with any law or regulation in any state, province or country.

# Terms and Conditions

## **Lifetime Product Guarantee (INFINITY DRAIN, LTD. STAINLESS STEEL SHOWER BASE)**

Infinity Drain products have been manufactured under the highest standards of quality and workmanship. Infinity Drain provides a lifetime guarantee on its stainless steel shower base (INFINITY DRAIN SSB SERIES only).

This guarantee is extended to the original installer of the product, the owner/developer of the installation site and the original owner of the finished product site (homeowner or landlord). This guarantee DOES NOT extend to any subsequent owners or users of the property. This lifetime coverage terminates upon the sale of the property to a subsequent owner of the property.

Infinity Drain guarantees that our stainless steel shower base (INFINITY DRAIN SSB SERIES) will be free from any and all leaks as well as free from defects in material and manufacturing workmanship, when subject to normal use during the lifetime of the original owner as stated above.

If the aforementioned Infinity Drain product should develop a leak during the guarantee period as defined above, Infinity Drain will provide a replacement shower base (INFINITY DRAIN SSB SERIES) at no cost to the claimant under the guarantee. Infinity Drain will further bear the cost of labor to remove and replace the defective Infinity Drain product and will restore the installation with the same "like and kind" materials originally used at no cost to the claimant.

THIS GUARANTEE IS APPLICABLE ONLY TO STAINLESS STEEL SHOWER BASES (INFINITY DRAIN SSB SERIES) purchased directly from INFINITY DRAIN or AN AUTHORIZED INFINITY DRAIN RETAILER AFTER MAY 1, 2019. NOTWITHSTANDING ANYTHING TO THE CONTRARY HEREIN, THE MAXIMUM LIABILITY OF EACH INCIDENT SHALL NOT EXCEED \$100 PER SQUARE FOOT FOR RESTORING THE INSTALLATION TO ITS ORIGINALLY INSTALLED CONDITION.

THIS GUARANTEE IS SUBJECT TO THE FOLLOWING LIMITATIONS:

1. The guaranteed product must have been installed in accordance with the manufacturer's explicit installation instructions. Products not installed in this manner WILL NOT be COVERED.
2. Installation must be completed using any and all Infinity Drain recommended products, materials and procedures, where applicable.
3. Infinity Drain shall solely determine whether the product was installed according to its installation instructions. Improper or inferior installation of such product will also expressly void this guarantee.

# Terms and Conditions

4. Any alteration to, or modification of the original design and manufacture of the Infinity Drain Stainless Steel Shower Base (INFINITY DRAIN SSB SERIES) will result in the voiding of this lifetime guarantee.
5. The original owner shall have the burden of establishing to Infinity Drain's reasonable satisfaction: (a) the date of the purchase of the product (b) that the product was purchased directly from Infinity Drain or an authorized retailer of Infinity Drain (c) the original owner's current ownership of the premises in which Infinity Drain's product was installed.
6. This guarantee will not cover claims for the following:
  - (a) Damage to or failure of the guaranteed product resulting from acts of the homeowner, the installer or another third party
  - (b) Damage to or failure of the product resulting from unreasonable use or the failure to reasonably maintain the product after the date of purchase
  - (c) Damage due to installation error, product abuse, product misuse, or use of cleaners containing abrasives, or other organic or chemical solvents, whether performed by a contractor, service company, or the purchaser are excluded from this guarantee
  - (d) Damage due to criminal acts, acts of terrorism or acts of god
7. Infinity Drain will not be responsible for labor charges and/or damage incurred in installation, repair or replacement (other than those completed by an authorized Infinity Drain representative) in addressing a guarantee claim.
8. THE PROVISIONS OF THIS GUARANTEE ARE IN LIEU OF ANY OTHER GUARANTEE, EITHER EXPRESS OR IMPLIED, INCLUDING SPECIFICALLY, BUT NOT LIMITED TO, ANY GUARANTEE OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.
9. THE OBLIGATIONS AND LIABILITIES OF INFINITY DRAIN UNDER THIS GUARANTEE OR UNDER ANY IMPLIED GUARANTEE WHICH IS APPLICABLE DESPITE THE PRECEEDING DISCLAIMER ARE IN LIEU OF ALL OTHER OBLIGATIONS OR LIABILITIES INCLUDING, WITHOUT LIMITATION, LIABILITY FOR INCIDENTAL, CONSEQUENTIAL AND/OR ANY OTHER DAMAGES BASED UPON ANY THEORY OF RECOVERY AT LAW OR IN EQUITY. THESE INCLUDE SPECIFICALLY ANY THEORY OR NEGLIGENCE, BREACH OF CONTRACT, BREACH OF GUARANTEE OR STRICT LIABILITY.

THIS GUARANTEE IS SUBJECT TO THE FOLLOWING CUSTOMER RESPONSIBILITIES:

The guarantee claimant must notify Infinity Drain within thirty (30) days of discovering the basis for a claim under this guarantee. This notice must be made IN WRITING and MUST PROVIDE proof of the date of purchase of the STAINLESS STEEL SHOWER BASE (INFINITY DRAIN SSB SERIES) from

# Terms and Conditions

either INFINITY DRAIN directly, or through an AUTHORIZED INFINITY DRAIN RETAILER, as well as proof of CURRENT ownership of the property where the product is located.

All notifications must be sent via EMAIL to: [claims@infinitydrain.com](mailto:claims@infinitydrain.com)

Furthermore, the claimant may be required to submit photographic evidence, or other requested documentation, to Infinity Drain, along with or subsequent to their submission of a claim. Infinity Drain will then investigate the claim in a timely manner. If a defect covered by this guarantee is confirmed by Infinity Drain, Infinity Drain will satisfy its obligation set forth under this guarantee within a reasonable amount of time.

Infinity Drain MUST BE ALLOWED a reasonable opportunity to determine and fulfill its obligations under this guarantee before the original owner or others take any step to make repairs. Furthermore, Infinity Drain or its contractors or representatives must be given access, during regular business hours, to the site of the claim as needed. The claimant's failure to abide by the terms of this provision shall void any and all responsibility of Infinity Drain.

# Terms and Conditions

## Delivery and Exclusions

Transport, handling or installation damages are excluded from the Limited Warranty. The merchandise will be delivered within a reasonable time after the receipt of Recipient's purchase order, subject to the availability of the merchandise. Infinity Drain shall not be liable for any delays, loss or damage in transit of any merchandise.

Infinity Drain shall not be liable for any non-delivery of merchandise (even if caused by Infinity Drain's negligence) unless Recipient gives written notice to Infinity Drain of the non-delivery within five (5) days of the date when the merchandise would in the ordinary course of events have been received. Any liability of Infinity Drain for non-delivery of merchandise shall be limited to, at infinity Drain's option, either: (i) replacing the merchandise within a reasonable time, or (ii) adjusting any applicable invoice respecting such merchandise to reflect the actual quantity delivered.

Any merchandise that must be changed or replaced pursuant to the Limited Warranty will be itself warranted up until a two (2) year period following any such change or replacement. Infinity Drain shall not be liable or responsible to any Recipient, nor be deemed to have defaulted or breached these Terms, for any failure or delay in fulfilling or performing any term of these Terms when and to the extent such failure or delay is caused by or results from acts or circumstances beyond the reasonable control of Infinity Drain including, without limitation, acts of God, flood, fire, earthquake, explosion, governmental actions, war, invasion or hostilities (whether war is declared or not), terrorist threats or acts, riot, other civil unrest, national emergency, revolution, insurrection, epidemic, lockouts, strikes or other labor disputes (whether or not relating to either party's workforce), restraints or delays affecting carriers or inability or delay in obtaining supplies of adequate or suitable materials, materials, telecommunication breakdown, power outage or any other force majeure event.

## Limitation of Liability

**INFINITY DRAIN MAKES NO WARRANTY WHATSOEVER WITH RESPECT TO ITS MERCHANDISE, INCLUDING WITHOUT LIMITATION ANY: (A) WARRANTY OF MERCHANTABILITY; (B) WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE; (C) WARRANTY OF TITLE; OR (D) WARRANTY AGAINST INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS OF A THIRD PARTY; WHETHER EXPRESS OR IMPLIED BY LAW, COURSE OF DEALING, COURSE OF PERFORMANCE, USAGE OF TRADE OR OTHERWISE.**

**THE REMEDIES SET FORTH IN THESE TERMS SHALL BE THE RECIPIENT'S SOLE AND EXCLUSIVE REMEDY AND INFINITY DRAIN'S ENTIRE LIABILITY FOR ANY BREACH OF THE LIMITED WARRANTY SET FORTH IN THESE TERMS.**

**IN NO EVENT SHALL INFINITY DRAIN BE LIABLE TO RECIPIENT OR ANY THIRD PARTY FOR ANY LOSS OF USE, REVENUE OR PROFIT, OR FOR ANY CONSEQUENTIAL, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR PUNITIVE DAMAGES WHETHER ARISING OUT OF BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE, REGARDLESS OF WHETHER SUCH DAMAGES WERE FORESEEABLE AND WHETHER OR NOT RECIPIENT**

# Terms and Conditions

**HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, AND NOTWITHSTANDING THE FAILURE OF ANY AGREED OR OTHER REMEDY OF ITS ESSENTIAL PURPOSE.**

**IN NO EVENT SHALL INFINITY DRAIN'S AGGREGATE LIABILITY ARISING OUT OF OR RELATED TO THESE TERMS, WHETHER ARISING OUT OF OR RELATED TO BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE, EXCEED THE TOTAL OF THE AMOUNTS PAID TO INFINITY DRAIN FOR THE MERCHANDISE SOLD HEREUNDER.**

## Claims, Returns and Restocking Charges

All claims for damages and shortages in connection with any delivery must be reported to Infinity Drain in writing within five (5) days of delivery. Please notify customer service within thirty (30) days of any missing parts or defects. Merchandise may not be returned for any reason without prior written consent from Infinity Drain. Infinity Drain reserves the right to refuse a return on a non-standard drain. Returns will not be accepted unless an RGA number from Infinity Drain is clearly marked on each box. The RGA must be obtained by emailing [RGA@infinitydrain.com](mailto:RGA@infinitydrain.com). A specialist will review the RGA request, and upon approval will issue the RGA number. Merchandise may be returned up to ninety (90) days from date of receipt. RGA numbers are valid for thirty (30) days from issue date. Merchandise must be received within thirty (30) days from the RGA date of issue. All items will be subject to inspection by Infinity Drain. All items must be returned unused and in original condition, including packaging, components part, and all other container contents. A minimum of the greater of: (i) a twenty-five percent (25%) charge on the Recipient's base net price, or (ii) \$25.00, will be imposed as a restocking charge for each returned item accepted by Infinity Drain, in addition to all applicable charges for labor, materials and/or freight. All returned merchandise must be shipped freight prepaid.

## Modifications

Infinity Drain reserves the right to change, without notice, the models, the specifications and the price of its merchandise. Infinity Drain also reserves the right to change these Terms & Conditions without notice.

## Merchandise Ownership and Insurance

Infinity Drain will remain the owner of all merchandise sold until full and final payment of the invoice is received by Infinity Drain. Until such time that an invoice is paid in full, the Recipient must take reasonable care of the Infinity Drain merchandise and will be held responsible for all losses and damages when in possession of the merchandise. During the term of these Terms and for a period of two (2) years thereafter, the Recipient shall, at its own expense, maintain and carry insurance in full force and effect which includes, but is not limited to, commercial general liability (including product liability) in a sum no less than one million dollars (\$1,000,000.00) with financially sound and reputable insurers. Upon Infinity Drain's request, Recipient shall provide Infinity Drain with a certificate of insurance from Recipient's insurer evidencing the insurance coverage specified in these Terms. Recipient shall provide Infinity Drain with ten (10) days' advance written notice in the event of a cancellation or material change in Recipient's insurance policy.

# Terms and Conditions

## Advising Obligations

In the case of a dealer, such dealer agrees to advise Infinity Drain in writing of all seizures, losses or damages that involve any Infinity Drain merchandise in dealer's inventory for which Infinity Drain has not been paid in full, within three (3) business days of becoming aware of all such seizures, losses or damages.

## Intellectual Property Rights and Other Proprietary Rights

Each Recipient acknowledges that all intellectual property rights and other proprietary rights regarding Infinity Drain's business, activities, merchandise, and promotional material, and any technology pertaining thereto, are the sole property of Infinity Drain. Each Recipient agrees to limit its use of Infinity Drain's intellectual property rights and other proprietary rights to only those uses expressly authorized by Infinity Drain. Each Recipient agrees to promptly and fully inform Infinity Drain of any infringement or alleged infringement of any Infinity Drain intellectual property rights or other proprietary rights by any person, including any competitor of Infinity Drain, of which such Recipient may become aware.

## Freight Charges

Freight charges apply to drains, as well as residential, commercial and construction site drop shipments. Other shipping charges such as re-consignment, redelivery and storage charges may apply when requested by a Recipient. Please contact Infinity Drain's order desk for applicable fees.

## Cancellation Policy

All stock orders cancelled after forty-eight (48) hours will incur a ten percent (10%) cancellation charge.

## General Terms

All matters arising out of or relating to these Terms shall be governed by and construed in accordance with the laws of the State of New York without giving effect to any choice or conflict of law provision. Any legal suit, action or proceeding arising out of or relating to these Terms shall be instituted in the state courts located in Suffolk County, New York or the federal courts of the United States of America located in Suffolk County, New York, and each party irrevocably submits to the exclusive jurisdiction of such courts in any such suit, action or proceeding.

If any term or provision of these Terms is held invalid, illegal or unenforceable by a Court of competent jurisdiction, such invalidity, illegality or unenforceability shall not affect any

# Terms and Conditions

other term or provision of these Terms or invalidate or render unenforceable such term or provision in any other jurisdiction. No waiver by Infinity Drain of any of the provisions of these Terms is effective unless explicitly set forth in writing and signed by Infinity Drain. No failure to exercise, or delay in exercising, any right, remedy, power or privilege arising from these Terms operates, or may be construed, as a waiver thereof. No single or partial exercise of any right, remedy, power or privilege hereunder precludes any other or further exercise thereof or the exercise of any other right, remedy, power or privilege.

These Terms cannot be modified or extended in any way whatsoever by any agent, dealer, distributor, service company, customer or other party other than by a writing signed by an authorized representative of Infinity Drain.

## Compliance with Law

The Recipient shall comply with all applicable laws, regulations and ordinances and shall maintain in effect all the licenses, permissions, authorizations, consents and permits that it needs to carry out its obligations under these Terms.

## Termination

In addition to any remedies that may be provided under these Terms, Infinity Drain may terminate these Terms with immediate effect upon written notice to Recipient, if such Recipient: (i) fails to pay any amount when due under these Terms; (ii) has not otherwise performed or complied with any of these Terms, in whole or in part; or (iii) becomes insolvent, files a petition for bankruptcy or commences or has commenced against it proceedings relating to bankruptcy, receivership, reorganization or assignment for the benefit of creditors.
